Sinopsis

ISBN: 9781597266789

State of the Wild is a biennial series that brings together international conservation experts and writers to discuss emerging issues in the conservation of wildlife and wild places. Each volume in the series combines evocative writings with a fascinating tour of conservation news highlights and vital statistics from around the world.

One-third of each volume focuses on a topic of particular concern to conservationists. This 2010-2011 edition considers how destabilization and war affect wildlife and wild places.

Only recently has the international community begun to appreciate the cost of conflict—simmering tension, war, and reconstruction—on the natural world. This special section examines the role that conservation plays in the context of human conflict considering issues such as, Can the work of saving wildlife and wild places help ameliorate tensions? Can conservation deepen political understanding? Can conservation help in post-conflict situations?

The book's twenty essays are intermixed with poetry and beautiful photos that capture our connection to the wild.

State of the Wild's accessible approach educates a wide range of audiences while at the same time presenting leading-edge scientific overviews of hot topics in conservation. Uniquely structured with magazine-like features up front, conservation news in the middle, and essays from eminent authors and experienced scientists throughout, this landmark series is an essential addition to any environmental bookshelf.

Visit the Wildlife Conservation Society's State of the Wild site.

Biographies

Founded in 1895, the Wildlife Conservation Society saves wildlife and wild places through science, international conservation, education, and the management of the world's largest system
