Título: Computer Networking. A Top-Down Approach

Autor: Ross Kurose

Precio: \$2048.00

Editorial:

Año: 2009

Tema:

Edición: 5ª

Sinopsis

ISBN: 9780136079675

Building on the successful top-down approach of previous editions, the Fifth Edition of Computer Networking continues with an early emphasis on application-layer paradigms and application programming interfaces, encouraging a hands-on experience with protocols and networking concepts. With this edition, Kurose and Ross have revised and modernized treatment of some key chapters to integrate the most current and relevant networking technologies.

Networking today involves much more than standards specifying message formats and protocol behaviors-and it is far more interesting. Professors Kurose and Ross focus on describing emerging principles in a lively and engaging manner and then illustrate these principles with examples drawn from Internet architecture.
