Sinopsis

ISBN: 9780137144549

Educational Psychology, 11/e, is still the most applied text on the market, this text is replete with examples, lesson segments, case studies, and practical ideas from experienced teachers. The text provides solid, up-to-date coverage of the foundational areas within educational psychology: learning, development, motivation, teaching, and assessment, combined with intelligent examination of emerging trends in the field and society that affect student learning, such as student diversity, inclusion of students with special learning needs, technology, education and neuroscience, and No Child Left Behind.
