**Sinopsis**

**ISBN:** 9781402085703

The volume covers, in three Sections, the management of perennial and annual crop diseases. The first Section includes stone fruit and apple diseases, grapevine and fruit crops phytoplasma, Phytophthora on citrus, chestnut diseases, esca complex on grapevine and Rosellinia necatrix root rot. The second Section includes models for potato late blight management and Phytophthora decision-support systems, management of bacterial fruit-blotch on cucurbits, Verticillium on tomato, Sclerotinia on carrot, cotton and rice diseases, and rusts. In the third, final Section, two innovative topics are reviewed: DNA fingerprinting diagnostics, and management through endophytes and metabolites, a field with new perspectives in IPM.
