Título: Some Problems On Nonlinear Hyperbolic Equations And Applications

Autor: Li, Tatsien; Peng, Yuejun; Rao, Bopeng (Ed)

Precio: \$1350.00

Editorial:

Año: 2010

Tema:

Edición: 1^a

Sinopsis

ISBN: 9789814322881

This volume is composed of two parts: Mathematical and Numerical Analysis for Strongly Nonlinear Plasma Models and Exact Controllability and Observability for Quasilinear Hyperbolic Systems and Applications. It presents recent progress and results obtained in the domains related to both subjects without attaching much importance to the details of proofs but rather to difficulties encountered, to open problems and possible ways to be exploited. It will be very useful for promoting further study on some important problems in the future.
