This series reports on new developments in mathematical research and teaching-quickly, informally and at a high level. The type of material considered for publication includes

1. Research monographs.
2. Lectures on a new field or presentations of a new angle in a classical field.
3. Summer schools and intensive courses on topics of current research.

Texts are out of print but still in demand may also be considered.

The timeliness of a manuscript is sometimes more important than its form, which may in such cases be preliminary or tentative.
