**Precio:** \$101.00

**Editorial:**

**Año:** 1998

**Tema:**

**Edición:** 1ª

**Sinopsis**

**ISBN:** 9780590023191

While admiring amazing photographs capturing such moments as the "crown" created by a water drop splashing in a pool, or a "wild wave" caused by an egg dropped in a water glass, readers will learn about evaporation, condensation, snowflakes, how clouds form, and more. "A fine, eye-catching introduction to a well-focussed topic." - Booklist
