Sinopsis

ISBN: 9780439833806

Designed to both captivate and inform young readers, this fascinating series is a combination of biography, history, and science - featuring an innovative question-and-answer format, mix of photographs and illustrations, and interactive experiments.

The life of Thomas Alva Edison is revealed here - from his mid-19th century boyhood, to the establishment of his "invention factory" in Menlo Park, N.J., to his invention of the first electric lightbulb.
