Comparative Public Budgeting and Finance is a collection of original chapters examining public budgeting issues, methods, and techniques in countries around the world. Each chapter explores the history of the budget system and how it fits within the political system in the country, as well as the legal foundation and any reforms that affect the budget system. A discussion of revenue and expenditure allocations is included in each section.

Each chapter also examines topics such as: budget behavior and decision making, capital budgeting, analytical processes, budget processes, intergovernmental relations, budget reform, performance budgeting, and financial management. Each chapter concludes with a list of thought provoking questions, an appendix, end notes and a glossary which provides a point of departure for classroom discussion as well as individual student research on each country.
