Título: Linear Integral Equations

Autor: Vernon Lovitt, William Precio: \$990.00

Editorial: Año: 2005

Tema: Edición: 11^a

Sinopsis ISBN: 9780486442853

Readable and systematic, this volume offers coherent presentations of not only the general theory of linear equations with a single integration, but also of applications to differential equations, the calculus of variations, and special areas in mathematical physics. Topics include the solution of Fredholm's equation expressed as a ratio of two integral series in lambda, free and constrained vibrations of an elastic string, and auxiliary theorems on harmonic functions. Discussion of the Hilbert-Schmidt theory covers boundary problems for ordinary linear differential equations, vibration problems, and flow of heat in a bar.
