Sinopsis

ISBN: 9780486432380

With the objective of making into a science the art of verifying computer programs (debugging), the author addresses both practical and theoretical aspects. Subjects include computability (with discussions of finite automata and Turing machines); predicate calculus; verification of programs (both flowchart and algol-like programs); flowchart schemas; and the fixpoint theory of programs. 1974 edition. Includes 77 figures.
