Edición: 2ª

Sinopsis

ISBN: 9780821849743

This is the second edition of the now definitive text on partial differential equations (PDE). It offers a comprehensive survey of modern techniques in the theoretical study of PDE with particular emphasis on nonlinear equations. Its wide scope and clear exposition make it a great text for a graduate course in PDE. For this edition, the author has made numerous changes, including

a new chapter on nonlinear wave equations,
more than 80 new exercises,
several new sections,
a significantly expanded bibliography.
