Edición: 1^a

Sinopsis

ISBN: 9780309138642

Reflecting recent scientific developments and new regulations, this report updates National Research Council guidelines that have served as an authoritative reference for the safe use of hazardous chemicals in laboratories for almost thirty years. The guidelines are used by laboratory personnel as well as regulatory agencies worldwide concerned with safety in the workplace and environmental protection. New topics covered in this update include: emergency planning, laboratory security, green chemistry, compatible chemical storage, and the handling of nanomaterials. Moreover, there is an expanded discussion of environmental health and safety systems.
