Sinopsis

ISBN: 9781420087239

New to the Second Edition

More than 1,000 pages with over 1,500 new first-, second-, third-, fourth-, and higher-order nonlinear equations with solutions

Parabolic, hyperbolic, elliptic, and other systems of equations with solutions

Some exact methods and transformations

Symbolic and numerical methods for solving nonlinear PDEs with MapleÖ, Mathematica®, and MATLAB®

Many new illustrative examples and tables

A large list of references consisting of over 1,300 sources

To accommodate different mathematical backgrounds, the authors avoid wherever possible the use of special terminology. They outline the methods in a schematic, simplified manner and arrange the material in increasing order of complexity.
