Título: Buildings, Finite Geometries And Groups

Autor: Sastry, Narasimha

Precio: \$2160.50

Editorial:

Año: 2012

Tema:

Edición: 1^a

Sinopsis

ISBN: 9781461407089

This volume collects articles inspired by the Proceedings of the ICM 2010 Satellite Conference on "Buildings, Finite Geometries and Groups" organized at the Indian Statistical Institute, Bangalore, from August 29 - 31, 2010. These contributors include some of the most active researchers in areas related to finite simple groups, Chevalley groups and their generalizations: theory of buildings, finite incidence geometries, modular representations, Lie theory, and more. Contributions reflect the current major trends in research in the geometric and combinatorial aspects of the study of these groups.
