Sinopsis

ISBN: 9780826455208

Applied Linguistics as Social Science surveys the increasing dialogue between linguistics and social theory. The book shows how social theory, applied linguistics and sociolinguistics share a set of common concerns, and how an analysis of these to produce a social scientific account of applied linguistics helps to explain the interaction between social structures, human agents and language. Foreword | Introduction | Making connections: some key issues in social theory and applied linguistics | Sociology and ideas about language | Language as a cultural emergent property | Researching language learning: theories, evidence, claims | Social categories and theoretical descriptions | Social domain theory: interpreting intercultural communication | Language in the world: properties and powers | A social realist approach to research in applied linguistics
