Sinopsis

ISBN: 9780815336624

The absorbing subject of sexuality in the Middle Ages is examined in 19 original articles written specifically for this Handbook by the major authorities in their scholarly specialties. The study of medieval sexuality poses problems for the researcher: indices in standard sources rarely refer to sexual topics, and standard secondary sources often ignore the material or say little about it. Yet a vast amount of research is available, and the information is accessible to the student who knows where to look and what to look for. This volume is a valuable guide to the material and an indicator of what subjects are likely to yield fresh scholarly rewards.
