This volume contains the proceedings of the 10th International Conference on Finite Fields and their Applications (Fq 10), held July 11-15, 2011, in Ghent, Belgium.

Research on finite fields and their practical applications continues to flourish. This volume's topics, which include finite geometry, finite semifields, bent functions, polynomial theory, designs, and function fields, show the variety of research in this area and prove the tremendous importance of finite field theory.
