Título: Probabilistic Group Theory, Combinatorics, And Computing

Autor: Detinko, Alla; Flannery, Dane; O'brien, Eamonn (Eds.) **Precio:** \$821.96

Editorial: **Año:** 2013

Tema: **Edición:** 1ª

Sinopsis **ISBN:** 9781447148135

Unique selection of frontier results which are not available in any other sources

Authors are world leading researchers

Each chapter is a ready-made graduate lecture course

Probabilistic Group Theory, Combinatorics, and Computing is based on lecture courses held at the Fifth de Brún Workshop in Galway, Ireland in April 2011. Each course discusses computational and algorithmic aspects that have recently emerged at the interface of group theory and combinatorics, with a strong focus on probabilistic methods and results. The courses served as a forum for devising new strategic approaches and for discussing the main open problems to be solved in the further development of each area. The book represents a valuable resource for advanced lecture courses. Researchers at all levels are introduced to the main methods and the state-of-the-art, leading up to the very latest developments. One primary aim of the book's approach and design is to enable postgraduate students to make immediate use of the material presented.

Content Level » Research

Keywords » Algorithm - Combinatorial design - Complexity - Group - Probability
