Título: Holomorphic Functions In The Plane And N-Dimensional Space

Autor: Klaus Gürlebeck	Precio: \$675.00
Editorial:	Año: 2007
Tema:	Edición: 1ª
Sinopsis	ISBN: 9783764382711

Complex analysis nowadays has higher-dimensional analoga: the algebra of complex numbers is replaced then by the non-commutative algebra of real quaternions or by Clifford algebras. During the last 30 years the so-called quaternionic and Clifford or hypercomplex analysis successfully developed to a powerful theory with many applications in analysis, engineering and mathematical physics. This textbook introduces both to classical and higher-dimensional results based on a uniform notion of holomorphy. Historical remarks, lots of examples, figures and exercises accompany each chapter.
