- Keith Dawson, Experimental Agriculture

This pathbreaking book contributes to the discourse of evidence-based policy-making. It does so by combining the two issues of policy evaluation and sustainable development linking both to the policy-cycle. It covers contributions:

- examining the perception of sustainability problems, which analyse the relationship between sustainability and assessment;

- highlighting the role of evaluation and impact assessment studies during policy formulation;
- looking at policy implementation by examining sustainability and impact assessment systems in different application areas;
- addressing policy reformulation by considering monitoring and quality improvement schemes;
- assessing the quality of sustainability evaluation studies.

Providing theoretic insights, reflections and case studies, this novel study will prove essential to postgraduate students, practitioners, policy-makers and researchers in the area of sustainable development, policy-making and evaluation.
