Título: Migration And Climate Change

Autor: Graeme Hugo

Precio: \$8320.00

Editorial:

Año: 2013

Tema:

Edición: 1ª

Sinopsis

ISBN: 9781849808514

In this important collection, Professor Hugo draws together key articles and papers by leading scholars and agencies which investigate the current and future effects of climate change on migration. Topics covered include the impact of climate change on the movement of people within and across countries, the economic and social effects of the forced displacement and resettlement of migrants, the flows of migration resulting from environmental disasters, the risks of conflict and the implications of climate change for vulnerable areas e.g deltas, atolls and coastal regions. The volume concludes with an examination of what the policy responses of governments and international agencies are and should be.

Contents

44 articles, dating from 1993 to 2010 Contributors include: S. Adamo, W.N. Adger, J. Barnett, S. Castles, M. Cernea, J. Connell, R. McLeman, E. Piguet, K. Warner, R. Zetter

Further information

In this important collection, Professor Hugo draws together key articles and papers by leading scholars and agencies which investigate the current and future effects of climate change on migration. Topics covered include the impact of climate change on the movement of people within and across countries, the economic and social effects of the forced displacement and resettlement of migrants, the flows of migration resulting from environmental disasters, the risks of conflict and the implications of climate change for vulnerable areas e.g. deltas, atolls and coastal regions. The volume concludes with an examination of what the policy responses of governments and international agencies are and should be.

With an original introductory essay by the editor, this volume will be of great interest and value to scholars and policymakers and all those interested in this highly topical and crucial subject.
