Título: Elliptic Curves, Hilbert Modular Forms And Galois Deformations

Autor: Berge, Laurent

Precio: \$668.17

Editorial:

Año: 2013

Tema:

Edición: 1^a

Sinopsis

ISBN: 9783034806176

The notes in this volumen correspond to advanced courses held at the Centre Recerca Matemática as part of the research program in Arithmetic Geometry in the 2009-2010 academic year.

The notes by Laurent Berger provide an introduction to p-adic Galois representations and Fonatine rings, wich are especially useful for describing many local deformation rings at p that arise naturally in Galois deformation theory.
