**Tema:**

**Edición:** 1<sup>a</sup>

**Sinopsis**

**ISBN:** 9783527325467

Encouraging a new attitude and approach to chemistry, this is the first such collection designed for lab courses and experimental teaching. Experts from around the globe present over 40 real-life teaching experiments, all clearly structured and divided into the five main principles of sustainable and green chemistry: catalysts, solvents, high yield and onepot syntheses, limiting waste and exposure, as well as special topics. With a foreword by Nobel prize winner Jean-Marie Lehn
