**Edición:** 1<sup>a</sup>

**Sinopsis**

**ISBN:** 9781617376467

his book examines a collection of state-of-the-art methods that employ monoclonal antibodies in a clinical setting. The chapters offer in-depth description for generating mouse and recombinant humanized antibodies, and a comprehensive review of how antibodies are being used in bead-based methods for measuring proteins. This field will continue to expand and provide new and innovative techniques in the laboratory and as a basis that complements targeted therapy.
