Título: Interactive Gpu-Based Visualization Of Large Dynamic Particle Data

Autor: Falk, Martin / Grottel, Sebastian / Krone, Michael / Reina,

Editorial:

Tema:

Sinopsis

Precio: \$1125.00

Año: 2016

Edición: 1^a

ISBN: 9781627052856

This book covers direct particle visualization using simple glyphs as well as abstractions that are application-driven such as clustering and aggregation. It targets visualization researchers and developers who are interested in visualization techniques for large, dynamic particle-based data. Its explanations focus on GPU-accelerated algorithms for high-performance rendering and data processing that run in real-time on modern desktop hardware. Consequently, the implementation of said algorithms and the required data structures to make use of the capabilities of modern graphics APIs are discussed in detail. Furthermore, it covers GPU-accelerated methods for the generation of application-dependent abstract representations. This includes various representations commonly used in application areas such as structural biology, systems biology, thermodynamics, and astrophysics
